**ICP DAS** is a leading manufacturer of Embedded Control, Data Acquisition and Data Communication products, including PAC, PLC, Embedded Controllers, Remote I/O, Modbus I/O, Modbus TCP I/O, Industrial Ethernet Switches, DeviceNet I/O and Gateway, CANBus I/O and Gateway, Signal Conditioners, PCI and ISA boards. If you are an OEM customer, we are fully capable of designing and manufacturing products according to your specifications; allowing you to save both development time, and money. ICP DAS is proudly listed as an **ISO 9001** and **ISO 9002** company!

**WinCON/LinCON-8000:** Combination IPC / PLC and running HMI and Logic all in one, the WinCON PAC system is a powerful and scalable industrial control / data acquisition, representing the latest evolution in control

**Industrial Ethernet switches / gateways:** ICP DAS offers a comprehensive selection of robust and cost effective industrial Ethernet products!

**I-8000:** Powerful line of rack mount embedded / PLC controllers! With a large selection of commercial off the shelf I/O & multiple programming languages, the I-8000 is an ideal choice for OEMs!

**Industrial fiber optic gateways:** A wide-ranging array of converters for use with SM/MM fiber connections. Provide a cost effective and robust, unmanaged solution!

**I-7188:** Compact and robust solution to meet a multitude of industrial control needs. Ideal for bringing large control infrastructures to your LAN! The I-7188 also supports over 75+ different I/O expansion boards, offering diversified, user specific solutions!

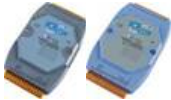

**Serial communication gateways:** ICP DAS offers a wide range of communication gateways and converters for RS-232/422/485, Modbus RTU, Modbus TCP, Ethernet, DeviceNet, and CAN Bus.

**NTE-210/220:** OEM quality industrial PC offers a multitude of communication & interface options, all coupled with a powerful embedded chipset architecture!

**Wireless communication:** ICP DAS offers a comprehensive selections of wireless radio communication devices to assist users in remote telemetry based applications!

**I/M-7000:** Diversified & compact distributed I/O solution! With over 85+ different I/O configurations available consumers can easily capabilities ranging from: digital I/O, analog I/O, thermocouple, RTD, to high speed counter capabilities and much more!

**Quick start solutions:** Looking for a training kit or test bench to develop your application? ICP DAS USA offers comprehensive turn key solutions, to help you cut development time, and increase productivity!

**I-8000/87k:** Comprehensive commercial off the shelf I/O solution for any ICP DAS rack mount controller! Line includes modules capable of: digital I/O, analog I/O, thermocouple, RTD, to high speed counter capabilities, motion control and much more!

**Industrial HMI accessories:** ICP DAS manufactures a full line of rugged and reliable industrial touch screen solutions to meet consumer's HMI needs!

**PCI / ISA Boards:** A full range of data acquisition & industrial control boards, to meet your PC / IPC driven control systems. Board capabilities include: digital I/O, analog I/O, thermocouple, RTD, to high speed counter capabilities, motion control and much more!

**Industrial control software:** ICP DAS USA proudly promotes multiple solutions to meet consumer's development & HMI software needs. For more information, please contact us directly!

**ET-6000:** series are web-based Ethernet I/O modules. Each one has a built-in web server that used for all configuration, I/O data monitoring and controlling using a regular web browser dynamically.

**Power Supplies:** ICP DAS offers the latest in Din-Rail mount and panel mount switching power supplies! ICP DAS power supplies are available in a bevy of configurations, ideal for almost any industrial control or data acquisition application!
