

Application Story: I-7000 Series Applied by Rockwell Collins

Rockwell Collins® Chooses ICP DAS I-7000 Controllers

Rockwell Collins,® a spin-off of Rockwell Automation makes aviation electronics and communication equipment for military and commercial aircrafts. Rockwell's Commercial Systems division is a leading provider of avionics and cabin electronics for business aviation and commercial air transport operations worldwide. They utilize the I-7018 to monitor the temperature within thermal ovens to ensure proper oven operation. The I-7018 is very manageable to use and provides more thermocouple inputs than similar devices from other manufacturers. ICP DAS meets the demanding technical needs of the commercial air transport industry.
