

NS-208G Gigabit Ethernet Switch: \$345.00

The NS-208G is an 8 x port 10/100/1000 Base-T auto-negotiating Ethernet switch, with MDI/MDIX functionality. The NS-208G can connect up to 7 workstations and automatically negotiate transmission speed (10 Mbps or 100 Mbps or 1000Mbps) for optimized corresponding connections. The NS-208G's flow control mechanism is also auto negotiated, for simplistic plug & play use. The NS-208G also features easy to ready link/data rate LEDs for each port to aid troubleshooting, an industrial spec ABS plastic case, and DIN-Rail mounting. For more information regarding the NS-208G, please [click here!](#)

Special Promotional Pricing for January / February 2007

NS-205: \$99.99 / NS-208: \$155.00
