**FOR IMMEDIATE RELEASE**

Release Date: September 3, 2010

**ICP DAS USA Introduces GT-530: Intelligent SMS Alarm Controller**

**Features:**

You can control your systems and get status from your cell phone via text message with [GT-530](#), our new Intelligent SMS Alarm controller. [GT-530](#) can be used as a remote control and alarm system which allows you to use your mobile phone to monitor and control your machines, home or business from any location. [GT-530](#) is being used in vending and gaming machines. It sends a text message to the machine operator when the machine is empty, full of coins or has an error. It is smart enough for use in applications like home security systems where audio alarms and text messages are sent to notify the appropriate contacts about a break-in or intrusion. [GT-530](#) can monitor a total of 10 digital inputs (6 counters). [GT-530](#) also has 2 Digital outputs which can be activated via Digital input trigger or SMS to control things like lamps, pumps, and heaters.

**Benefits:**

You can conveniently check [GT-530's](#) status remotely via text message. It uses simple commands and has a SMS tunnel function. It can be powered by external power or Li-Battery. [GT-530](#) supports UNICODE or 7 bit format which allows users to implement the sending of SMS messages with various languages. SMS reports can be sent via defined times or digital input or counter event triggers. The alarm facilities provide a flexible way to distribute critical alarm information to mobile phone users. It comes with an easy to use configuration utility so you can have your system up and running in minutes!

To learn more about the variety of ideas and real projects integrated with ICP DAS hardware, visit our website at [www.icpdas-usa.com](http://www.icpdas-usa.com), or give us a call, toll free, at 1-888-971-9888 and one of our engineers would be happy to assist in reviewing the project requirements, ensuring that the highest quality solution is presented in your final application.
