FOR IMMEDIATE RELEASE

PROFINET I/O Module PFN-2060 Released by ICP DAS USA, Inc.

ICP DAS USA, Inc. introduces [PFN-2060](#), a remote I/O Module specifically designed for PROFINET networks. It is communicable over Ethernet, has 6 isolated digital inputs and 6 relay outputs, providing you the best fit for PROFINET applications. It is suitable for various industrial applications such as Industrial Automation, Factory Automation, and Process Automation.

[PFN-2060](#) supports PROFINET standards and can be used with other devices that follow the PROFINET protocol. It comes with the Generic GSDML File (Version 2.25), which allows you easy access to configure it. For your convenience, we also provide the PFN_Tool configuration utility, which allows you to show the firmware version, configure network parameters, and set power-on and safe values.

[ICP DAS USA](#) is a cost-effective leader in the U.S. industrial market; offering a stunningly competitive price/performance ratio, while catering to the latest solutions for current industrial trends. We seek to provide our customers with cost-effective, flexible, and easy-to-use solutions for their Data Acquisition and Embedded Control Applications. [ICP DAS USA](#) provides a great variety of products with modular and universal solutions for any scale application or projects.

To learn more about the variety of ideas and real projects integrated with ICP DAS hardware, visit our website at www.icpdas-usa.com, or give us a call, toll free, at 1-888-971-9888 and one of our engineers would be happy to assist in reviewing the project requirements, ensuring that the highest quality solution is presented in your final application.
