

FAQs

Q: To upgrade from WinCon to WinPAC controllers, do I need to re-write the program for my application?

A: No. To upgrade Applications from WinCon to WinPAC just Copy and Play. The only thing that users have to do is copy the .exe file from WinCon-8000, paste it to WinPAC-8000, and play it. It's that simple.

For exceptions in old applications (.exe files) that are not able to follow the copy-and-paste rule, users can still upgrade by recompiling the old applications. The upgrade process does not take more than 7 steps.

Applications
