Featured Application Story

Modbus TCP Server / DeviceNet Master Gateway:
Connecting Ethernet Based Computer Networks to Existing Serial, Modbus RTU & DeviceNet Networks

I-7243D provides a communication protocol transfer of DeviceNet and Modbus/TCP protocols. It allows you to connect an existing DeviceNet network to Ethernet-based PLCs and PC-based configuration and monitoring systems. It enables DeviceNet networks to be coupled together over the Internet/Ethernet, whereby remote monitoring and control is possible. [Click here](#) for more information on the [I-7243D Modbus TCP Server / DeviceNet Master Gateway](#).

- **Protocols Supported:**
 - Ethernet, Modbus RTU, Serial, DeviceNet
- **Applications:**
 - Control Systems
 - Building Automation
 - Factory Automation
 - Data Acquisition

June 2007

USB to RS-232/422/485 Converter

I-7561: \$115.00

ICP DAS USA is proud to announce a special **promotional** offer to all recipients of our bi-weekly mailer! This month, we will be offering our [I-7561 USB to RS-232/422/485 Converter](#) at a reduced cost. This offer is extended to ICP DAS clientele*. For more information, be sure to visit [our web site](#) today! Be sure to act now; as pricing is set for a limited time only!

I-7561 Features:

- Allows the transfer of serial data over USB
- High Speed 115.2 KB/s transmission rate.
- Contains a "Self Tuner" Chip that auto-tunes the baud rate and data format to the RS-485 network
- Derives power from the USB port-- so does not need a power adapter.
- True "Plug and Play" device: No dip switch is needed to configure this module.
- Can bring up to 256 RS 485 devices on the same RS 485 bus. (Traditional converters only bring up 32 or 128 devices.)
- [I-7561 page](#)

*Offer not valid for resellers and distributors.

Featured Product

Modbus TCP Server / DeviceNet Master Gateway

I-7243D is a solution that provides a communication protocol transfer of DeviceNet and Modbus/TCP protocols. It solves a mission-critical problem: connecting an existing DeviceNet network to Ethernet-based PLCs and PC-based configuration and monitoring systems. It enables DeviceNet networks to be coupled together over the Internet/ Ethernet, whereby remote monitoring and control is possible. [Click here](#) for the I-7243D product information page.

- Supports Online adding and removing of devices from networks.
- Can Monitor and Configure Devices Online
- Supports up to 63 DeviceNet Devices
- Programmable DeviceNet Master MAC ID
- Supports DeviceNet I/O Mapping Table
- Predetermined Master/Slave Connection Set

We Moved! Feel Free to Visit Us at our LA Office!

We would like to inform you of our new location . Our phone and fax numbers have remained the same for your convenience. Please update your records. Please see our address and full contact information below:
