FOR IMMEDIATE RELEASE

ICP DAS USA, Inc. Introduces LP-5131 Linux Embedded Programmable Controller

Harbor City, CA—October 10, 2011 – [LP-5131](#) is equipped with a 520 MHz PXA270 CPU and runs [Linux](#) Kernel 2.6.19. It provides connectivity like a VGA port so you can connect a monitor, an Ethernet port for easy Internet access, and RS-232/485 ports to add serial devices like card readers. [Linux](#) is an open source operating system that is based on free and open source software. It's very easy to find documentation, demo programs and forums that discuss [Linux](#) based systems and projects.

[ICP DAS USA](#) is a cost effective leader in the US industrial market. They provide flexible, easy to use solutions that provide a competitive price to performance ratio and cater to the latest industrial trends. We provide a variety of products with modular solutions for any scale application or project.

[LP-5131](#) can be expanded upon very easily through an expansion board or through Field Bus I/O expansion over USB, TCP/IP or RS-232. It comes with a software development kit and has all the great features of Linux based systems like FTP server, web server, SSH server and UPnP.
